

ibmtechu Birmingham: LDAP 101

Contributed by Michael Felt

Hi everyone - Busy this week as a speaker for the IBM POWER Tech Univerisity in Birmingham. I am doing a couple of presentations on LDAP and shall add extracts of the presentations soon.

Right now - to make sure it is easy to find - I am putting the link to the Trials and Downloads for IBM Tivoli Directory Server - which is the starting point for my LDAP 101: Basic LDAP Install and Config on AIX class.

p.s. for the download you will need a "free" IBM userid - if you do not have one already.
