

## DPO Here, DPO There, DPO Everywhere

Contributed by Michael Felt

Time to plan for a disruptive update!

If you have a POWER7-770, POWER7-780 or POWER7-795 and do not have Dynamic Platform Optimizer - now is the time to start planning for that seldom "Disruptive Update". That is, long time coming - but now it is here for the Power7-770 and Power7-780 MHB (aka Model B frames) with the latest firmware AM780\_040 .

I'll be updating my POWER7 Latest Firmware table asap!
