

## Apache HTTPD 2.2.31 available!

Contributed by Michael Felt

I have been using my packaging of Apache HTTPD version 2.2.31 for about a week - to support \*.rootvg.net and \*.aixtools.net :smile:

See <http://www.aixtools.net/index.php/httpd-2.2> for more info. Requires openssl.base.1.0.1 which also works on AIX 5.3!
